

# Pinning results and using favourites

Personalize the Library Catalogue. Don't lose your search results. Pin them to your favourites folder.

Once you search for your topic, you can save your results in the favourites folder. To save any items, click on the pin icon. They will be added to your favourites folder.

The favourites folder now includes two saved resources. You can sort your results by date, author, or title. Each record contains automated citations in styles such as APA, MLA, and Chicago. You can email these records to yourself.

But once you leave the catalogue, these favourites will disappear. Sign in if you want to keep your results. Signing in will allow you to organize your results by applying labels. As your list grows, the labels will help you find your items.
