Sort by date in Omni

By default, Omni sorts results by relevance.

But what if you want the most current books about your topic?

On the results page, there are options to modify your search.

In the left column, use the dropdown menu next to Sort By, and choose Date-newest.

Then, to sort by resource type, for example books, look under Resource type, then select books & ebooks.

Now you'll see the most current books about your topic.

You can also sort by Date-oldest to find the least current books about your topic.
