

WILFRID LAURIER UNIVERSITY
Library Collection Policy
Department of Philosophy

Purpose

The Collection Development policy serves as a guide to shape relevant collections and to ensure consistency in collection development. Decisions to purchase library materials are primarily the responsibility of the Collections Librarian in consultation with faculty in the Department.

This policy has been developed by Peter Genzinger, the Collections Librarian, and reviewed and revised in consultation with the current departmental liaison, Dr. Ashwani Peetush.

Collection Focus

- To support teaching, study and research up to the Master's level. Secondary critical studies will be selected in relation to specific research and teaching needs of the faculty in the department.

Collection Scope

- **Language:** the collection will contain all works of important philosophers, at least in English translation. Major philosophers will be represented in the best critical standard editions; and, in the case of non-English writers, in the language of origin, as well as in English translation. The exception to this guideline would be for languages not written in the Roman alphabet. Secondary critical studies will be preferably in English. Such non-English works, if unavailable in translation, will be collected in the language of origin, if their importance is commonly acknowledged (e.g., as indicated in book reviews, standard bibliographies, etc).
- **Chronological Period:** all periods
- **Geographical Areas:** all areas
- **Publishers:** emphasis on academic publishers

Types, Formats, and Readership of Materials Collected

- Materials aimed at academic-level readership are selected
- Web-based formats for reference sources, journals and indexing sources are preferred. Print and microform are considered for reasons of cost, availability, expected use or long-term access.

- Single copies of books in print formats are generally selected. Web-based formats are selected on a title-by-title basis, especially if the title is of interest to users at multiple Laurier campuses. Duplication of print across Laurier campuses is generally avoided.
- Excluded types generally include textbooks, abridgements, study aids, limited editions, works by vanity presses, juvenile literature, audio-visual materials, reprints and partial contents (e.g., single issues of journals, electronic versions of single chapters of books).

Subjects Collected and Collecting Priorities

Collecting priorities are categorized into 3 levels:

- A=highest emphasis. The collection includes major published materials required to support the core teaching and research at the highest degree level offered by the Department.
- B=secondary emphasis. The collection includes a selection of materials to complement the discipline as a whole, although it may not be a primary focus for courses. Generally speaking, then, **Modern Philosophy [B790-B5802]** would fall into this category, although specific topics within this range would be at the A level. This level is also used to identify other departments that may have identified aspects of this area as something of highest emphasis (cf. below, for example, under "Special Topics," multiculturalism, gender & feminist theory, etc.
- C=selective emphasis. Highly selective, but includes, for example, basic reference works.
